

html2fpdf

Basic usage

You can now easily print text while mixing different styles : **bold**, *italic*, underlined, or ***all at once***!

You can also insert hyperlinks like this www.mousevpython.com, or include a hyperlink in an image. Just click on the one below.

Sample List

- option 1
 - 1. option 2
- option 3

| Header 1 | header 2 |
|----------|----------|
| cell 1 | cell 2 |
| cell 2 | cell 3 |
